

Clark Forklift

Clark Forklift Forklift Training - Currently, there are at least 350,000 Clark lift trucks performing worldwide, and more than 250,000 in use in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 exclusive designs of forklifts, with components covering more than 120,000 particular components for all of its automated equipment. Your regional Clark Dealer is your complete source for availability of all your parts needs offered by Clark Totalift.

Clark has an extraordinary Parts Distribution team. The parts warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to make certain exceptional service to both their buyers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Driven to offer the highest level of value and service to our customers, Clark remains on the cutting edge when it comes to enhancing efficiency and benefiting performance.

Clark Totalift has a really impressive intercontinental support network. With over 550 locations worldwide, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their customers predominates the material handling industry.

Clark proudly remains an innovative leader of the industrial equipment industry, revolutionizing protection features such as the operator restraint system. This exceptional commitment to safety is now a customary feature on every lift truck.

Clark has an unrelenting mission to have the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be globally certified with quality standard ISO 9001 in all of its production plants. Furthermore, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any environmental limitations, thus placing them in a prevailing market position.

Lean Production

Clark has chosen the structure of "Lean Production" at all of its assembly facilities for the reason that this system is particularly economical and allows for minimal use of resources. Established to ensure maximum efficiency, this system is designed to discover and acknowledge the most efficient ways for production facility management. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Engine Design

Clark's product engineers and suppliers join together to perfect the proficiency and excellence of their merchandise while minimizing costs. The contemporary value engineering program combines modern product growth and offers superior consumer support and service within the industry.
