JLG Telehandler

JLG Telehandler Training Regina - In the late 1960's John L. Grove, with his wife Cora started out on a cross country journey in their RV. Freshly retired, after spending several years working with his brother to build their crane business into an industry leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end result of a road expedition.

While on their trip, John spent time talking to previous business contacts whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered an infinite market for a product that could quickly and securely lift people in the air to accomplish upkeep and other construction services.

Upon returning from their travels, John formed a joint venture with two friends and bought a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty employees, they created and sold the first JLG aerial work platform. The business incorporates many of the simple design essentials of that original lift into current designs.

JLG forklifts have come a long way from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into many markets worldwide and develops new products to make certain customers are capable of being more effective and perform in the workplace within a safer environment.
