

Regina Counterbalance Forklift License

Regina Counterbalance Forklift License - When operated by totally trained operators, forklifts could become a major advantage for firms and companies. We can offer your employees a thorough training program which includes all parts of operating a powered lift device. Counterbalance forklift training provides operators of forklifts with the practical skill and understanding considered necessary to operate forklifts safely and efficiently. The program provides a combination of classroom theory, hands-on training and participant observation within a warehouse-type setting. Training could be on site and/or customized.

The course goes through the lift truck fundamentals, rules and regulations, parts, load centres and factors affecting stability. Procedures regarding the general operation of the forklift is taught, in addition to startup, circle checks, forward/reverse on level ground, shutdown, and operating around other people. Load handling topics consist of load pickup and placement, selection of loads, load security and integrity, loading and off-loading trailers. Participants would learn operational maintenance procedures, such as refueling and recharging. Safety issues in the workplace will be talked about. People participating would learn about the environmental conditions affecting lift truck performance and be able to recognize potential dangers. Advanced training on propane handling could be incorporated.

Employers and their employees could face penalties if they do not operate based on industry and national standards. Employees operating a counterbalance forklift will have to be knowledgeable about the safe operation rules of their forklift. Training is suggested for any person applying for work that needs forklift operation.

Within our small personalized classes, we offer both hands-on training and in-class theory. The options for personalized training would comprise entry level or refresher courses.

Entry-level Course Outline:

For anybody entering the workforce as an operator of a counterbalance forklift, this training course is for you. The successful student must pass a series of practical and written exams to finish the program. Subject matter comprises: fundamentals of powered lift trucks; general operating procedures; load handling; operational maintenance; basic rules and regulations, workplace safety.
